

Getting Started With ZOOM

For a video tutorial on how to setup zoom, visit here: <https://youtu.be/Ow1ajt3iWgl>, with additional information here: <https://youtu.be/znvCCxDageU>

Step 1

ZOOM is available for PC, Mac, mobile and tablet. For PC and Mac visit www.zoom.us/download
For mobile and tablet visit your devices app store/market place.

Step 2

If on a PC or Mac follow the instructions to install the software.

Step 3

Once downloaded you will need to create a free account. When asked to enter your name it would be helpful for the teacher if you could include the pupils name there.

Step 4

In the 'contacts' section add your teacher as a contact. Their email address will be in the following format

Firstname.Surname@brightondome.org

Step 5

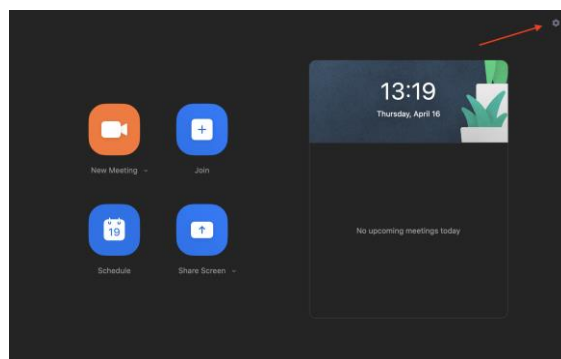

Your teacher will setup the lesson and send you an invite to attend.

Audio settings

We need to make a few adjustments to the audio settings to allow for the best quality audio.

For PC and Mac

From the main window click on the little cog that is in the right hand corner. This will bring up the settings menu.

Next, click on audio. From within that window, select 'advanced' and then check the box next to *'Show in-meeting option to "Enable Original Sound" from microphone'*

This means that when you are in a meeting, you can choose to turn on original sound. This allows the microphone to pick up exactly what it hears and not add on any noise suppression. This option appears in the top left of your meeting window.

If you have any problems enabling original sound, your teacher will be more than happy to guide you through the process.

For mobile and tablet

From the main menu select 'settings'. Then choose 'meetings'. As you scroll down you will see an option that says 'use original sound'. Make sure this is selected

Now when you are in a meeting you can press 'more' and then 'enable original sound'

If you have any problems enabling original sound, your teacher will be more than happy to guide you through the process.
